Method

The rate is the weighted average interest-rate equivalent, as the Bank of Ghana publishes it. One-month and one-year changes compare the latest auction with the auction closest to one month and one year earlier.

Real yields are the latest 364-day rate less the latest annual consumer price inflation published by the World Bank. Demand is the median, over the last 90 days, of bids received as a multiple of the amount offered.

The Afronomics African Sovereign Bill Index (ASBI) is the equal-weighted average of each market's latest one-year rate; its method is published at afronomicsfeed.com/markets/bill-index.

Expected auction dates come from each central bank's auction rhythm, not an official calendar.
