1.0. KEY FINANCIAL PERFORMANCE INDICATORS

Key Financial Performance Indicators (KPIs) are essential metrics used to evaluate the financial sector's health, efficiency, and profitability. This report focused on the total assets, deposits, gross loans, total income, and capital and other reserves of the Regulated SACCOs, undertaken on a comparative basis and presented on a yearly and quarterly basis to depict performance and growth.

Figures in Kshs. Billions

These Computation are based on Periodic Statutory Reports and Returns submitted to the Authority. The FSIs may change or vary after the auditing of the Financial Statements, as well as subjecting the FSIs to supervisory adjustments and stressed position.

2.0. FINANCIAL SOUNDNESS INDICATORS (FSIs)

The Authority applies a Risk-Based Supervision approach to the Regulated SACCOs in assessment of their stability and resilience to the challenges affecting the overall financial system. This is undertaken by reviewing the FSIs as guided by the Risk-Based Supervision Manual, as read with other international guidelines including the International Monetary Fund (IMF) and the East Africa Financial Soundness Indicators Compilation manual. The evaluation tool targets all areas that entail significant risks to the SACCOs from a "going concern" perspective using the CAEL rating models focussing on capital adequacy, asset quality, earnings and liquidity ratios.

3.0. SECTORAL LENDING ANALYSIS

Regulated SACCOs are key enablers in the facilitation of credit to their members, who ultimately finance various economic activities in Country. For the purpose of analysis, the activities are aligned with the International Standard Industrial Classification for uniformity and comparativeness with the Kenyan Statistics Industrial Classification (KeSIC) and International Monetary Fund Statistics Division.
