What it means for ZAR 100,000

Put ZAR 100,000 into the 364-day bill at this auction and you get back ZAR 107,500 after 12 months: ZAR 7,500 in interest before any withholding tax, about ZAR 625 a month. That is ZAR 30 less than the same money would have earned at the previous auction.

South Africa in the ASBI

South Africa ranks 9 of 10 markets by one-year rate, contributing 7.50% against an index of 12.37% (week of 19 Oct 2026).

Method, sources and how to cite

Method

The rate is the average rate at which bills are allotted in the weekly auction, as the South African Reserve Bank publishes it. One-month and one-year changes compare the latest auction with the auction closest to one month and one year earlier.

Real yields are the latest 364-day rate less the latest annual consumer price inflation published by the World Bank. Demand is the median, over the last 90 days, of bids received as a multiple of the amount offered.

The Afronomics African Sovereign Bill Index (ASBI) is the equal-weighted average of each market's latest one-year rate; its method is published at afronomicsfeed.com/markets/bill-index.

Expected auction dates come from each central bank's auction rhythm, not an official calendar.
